

## Distribution Efficiency...

ConectiSys introduces a new market-ready Alerts & Warnings application as part of a "Distribution Efficiency" program. This product fits perfectly into the product line and is available as additional feature to the existing products. Our market entry in Central and South-America affected our product line and resulted in language friendly user interfaces.

## Multiple Languages application...

Currently we support English, Spanish and German for the Alerts & Warnings application.

Meter Reading and Analysis applications are in designed and will be offered in the near future this work in process shall be released in the near future.

## Energy theft...

Is rapidly becoming a global problem requiring immediate cost efficient deployment of "AMR alert and warning solutions" to cover suspect points of consumption.

ConectiSys provides a self configuring, reliable, wireless network which enables utilities to act on time with a greater return on investment (ROI). Our Alerts & Warnings application is a low cost value added solution for utilities globally. Tampering and theft protection is essential to reduce energy costs and to stabilize energy distribution enhancements. Currently we support English, Spanish and German for the Alerts & Warnings application.
