

Report I

Volume 2011

January 06, 2011

Updates

The company anticipates 2011 to be an extremely vertical time and we look forward in managing our collective position to prosperity. We have generated tremendous interest in the company, as reflected in the large increased hits on our website and requests for information.

The company is pleased to announce the release of the complete English Spanish and German Help File tutorials as of 1/04/11 on its United Telemetry website. The Help File Tutorials were created to form a better understanding of the H-Net software features for utility training purposes such as Gas Natural-Fenosa.

The company has aligned with a Costa Rica manufacturer for building and assembly of the ConectiSys H-Net meters. We have been able to work with our United States component suppliers (including our meter supplier Landis+Gyr) to receive a duty free status for the importation from the US to our manufacturing in Costa Rica through the provisions of NAFTA which helps us reduce cost. We have acquired and purchased all of the parts necessary to deploy 500 units with Gas Natural Fenosa and anticipate shipping product in January 2011. We have produced an additional 100 units delegated for future pilots in both the US and Latin America when called upon. The company has also been continuing mining for suitable projects in the US.

ConectiSys CEO Robert Spigno will be leaving for Costa Rica on the 9th of January 2011 for manufacturing oversight, from there to Nicaragua for scheduling and installation purposes. Also, while in Nicaragua, Robert will be looking for further commitments with Gas Natural Fenosa to obtain additional projects in South America specifically targeting Panama and Columbia.

Marketing

The Company is currently in the process of design and build of three demonstration kits which will allow for live demonstrations within a customer's office. These kits will make their way throughout Utilities and Co-Operatives in North and South America over the course of 2011. Each kit will include (4) H-Net Meter Systems and (1) H-Net BaseStation for complete in office H-Net Network demonstrations. A ConectiSys representative will navigate through the H-Net System framework from additional hardware options to H-Net backend software capabilities and customization. Each customer will have a unique set of needs that the company will be looking to accommodate. The Company will have 2 sales individuals developing relationships with its initial focus on North and South America in 2011.

United Telemetry Company

The United Telemetry website has been updated for a more intuitive snapshot of the H-Net products and United Telemetry's function as a Network Operations Control Center. This will be an ongoing process. The Company is currently in the process of updating all marketing literature including interactive visual demonstrative illustration and video which is necessary for marketing purposes.

The company is also in the process of building a new animated audio/ visual presentation that would better describe H-Net's functions and capabilities. We are currently updating our Marketing Materials and preparing to go on the road in North and South America to seek out opportunity.

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995: The statements contained herein and in the Monthly Report that are not historical are forward-looking statements that are subject to risks and uncertainties that could cause actual results to differ materially from those expressed in the forward-looking statements including, but not limited to: the level of cost-effectiveness and efficiency of the Company's H-Net™ automatic meter reading products or technologies; changes in the Company's policies regarding communications with shareholders and the general public; the success or failure of the Company's marketing efforts and the particular efforts to be employed; the Company's ability or inability to commercialize, sell, license or further develop its H-Net™ automatic meter reading products or technologies; and other risks detailed from time to time in the Company's periodic reports and other filings with the Securities and Exchange Commission.
